WHAT is SCAHM?

The South Carolina Association for Hazard Mitigation (SCAHM) is a professional organization dedicated to educating South Carolina communities about hazard mitigation and loss prevention. Our members represent various professions, including but not limited to: building code enforcement officials and inspectors, company Presidents and Vice Presidents, emergency managers, engineers, floodplain managers, GIS technicians, hydrologists, planning and/or zoning officials, and project managers.

Each year in the spring, SCAHM sponsors an annual educational conference where we present educational sessions on multiple types of hazards. SCAHM also sponsors training courses on various hazard mitigation subjects throughout the year.

SCAHM is a Chapter Member of the Association of State Floodplain Managers, Inc. (ASFPM), the primary professional association of floodplain managers in the US.
